Company Overview

Illuminating better environments

Capability Statement:

Earthtrack Group is a leading supplier of LED lighting and solar solutions designed for mine site, industrial, government and commercial applications.

Our specialty is solar towers, trailers and all-in-one units that meets the growing trend toward renewable energy solutions for lighting and a wide range of site equipment. Our solar skids are proven to work in even the harshest environments and are pre-programmed for easy installation.

We also provide a range of lighting products to meet specific site requirements, such as underground or around combustible dusts, marine, high impact or vibration areas, large area or sports lighting, street, public area, emergency and decorative options.

Established in 2010, Earthtrack is a fast-growing company with 20+ staff and a strong national distribution network and are an ISO9001 Accredited Company. What makes us different is the technical lighting and solar expertise of our team to ensure your site is safe, productive and compliant with Australian Standards.
