**Your one stop shop**

## Capability Statement:

Verriers Engineering Services was established in 1946 and built a strong reputation within the industry by delivering quality workmanship and a reliable service.

Now under the direction of a 3rd generation of family, Verriers continues to service many industries including Transport, Rail, Oil & Gas, Mining and Automotive.

Verriers has a broad range of services including CNC Machining, Conventional Machining, Driveshaft Manufacture, Stud Removal, Fabrication, Diff Housing Straightening and Repair.

All of our team at Verriers are highly trained and share the companies mission to deliver a quality job on time in a safe manner.

Verriers Engineering recognizes the importance of maintaining the highest standards in all work carried out and the company has prided itself on nearly seven decades of high quality workmanship and products. Verriers Engineering has established a respected reputation for reliability in the products and services provided.

Verriers Engineering has received many awards in the past for excellence in the training of staff, an achievement that stems from the belief that quality is the responsibility of every employee and stakeholder within the business. Continuing to attain our high quality goals will be achieved through communication, consistency and establishing unity amongst all employees and management.

Verriers Engineering recognizes that it has a responsibility to the environment to wholly support and comply with current environmental legislation and codes of practice, in accordance with the Australian environmental agency and as outlined in the Environmental Protection Act 1986 and Environmental Regulations 2004.

CNC MACHINING

CONVENTIONAL MACHINING

DRIVESHAFT MANUFACTURE

DIFF HOUSING REPAIR

STUD REMOVAL

SPECIALISED WELDING

## INDUSTRIES

- Rail & Transport
- Mining/Minerals
- Materials Handling
- Subsea
- Energy
- Electronics
- Agriculture

## SERVICES

- CNC Machining : With 5 CNC machines and CAD/CAM software, Verriers provides fast, reliable service for one off complex parts and high volume needs.
- CAD/CAM: With the aid of CAD/CAM Verriers can manufacture the most complex components to exact specifications.
- Conventional Machining : Turning up to 1800mm dia. x 4000mm long. Conventional Milling and Horizontal Boring to 1500mm.
- Fabrication to AS1554
- Design
- Diff Housing Repair: From Cars and 4WD's to Trucks and Earthmoving equipment Verriers can straighten and repair any diff housing and using a specialised procedure re-quill a housing avoiding costly housing replacement.
- Dynamic Balancing Complete Driveshaft repair and manufacture services including Dynamic Balancing.
